Good Morning,

Last night Ms. Stanley indicated that the Curriculum Committee would have a work product on the proficiencies today.

As the public has been discussing this for close to two months and it has come up in two BOE meetings, I would ask that the District make this report publicly available immediately after the Curriculum Committee meeting today. This is an excellent example of how to reduce OPRA requests - make the minutes and work product of committee meetings publicly available.

I would also request that the District hold a Town Hall where the Superintendent fields questions from the public on this report as questions asked during BOE Meetings are not always answered.

Thank You  
John Migueis
